Discontinued Yarns

Use list if you have a book that quotes a discontinued Patons® yarn. In most cases, it is possible to substitute a discontinued yarn for a current Patons® yarn, if the gauge and needle or hook sizes are the same. If you have a pattern that quotes one of the yarns listed below, check our Patons® Yarns list on page 42 for a Patons® yarn with similar characteristics.

DETERMINING YOUR SIZE

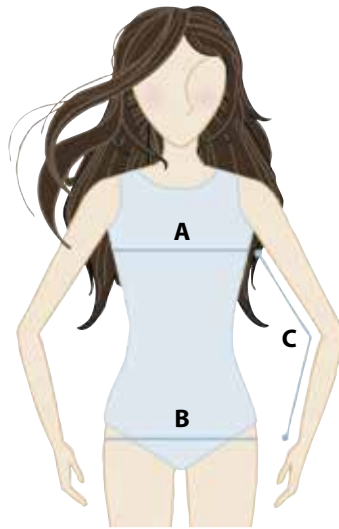

ADULT SIZES

Begin with your bust or chest measurement. Compare your measurement to the 'To fit bust/chest measurement' size line in your pattern and choose the closest match.

Bust Measurement (A): Using a tape measure, measure around the fullest part of your bust or chest keeping the tape measure straight across your back.

Hip Measurement (B): Measure around the fullest section which is generally 9" to 10" [23 to 25.5 cm] below the waistline.

Wrist to Underarm (C): Measure from the wrist along the inside of your arm to approximately 1" [2.5 cm] from your underarm crease. This is the measurement for the sleeve.

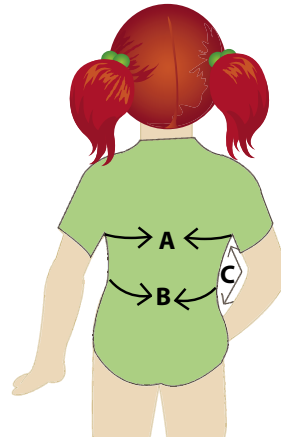

CHILD SIZES

Begin with chest measurement. Compare your measurement to the 'To fit chest measurement' size line in your pattern and choose the closest match.

Chest Measurement (A): Using a tape measure, measure around the fullest part of chest keeping the tape measure straight across the back.

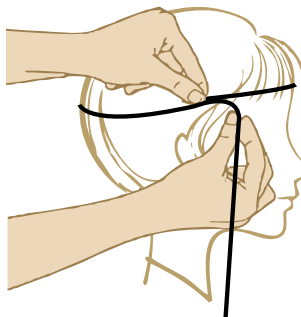

Waist Measurement (B): Tie a piece of string around the child's waist as a guide line. If you have problems finding the natural waistline, bend child sideways – the crease that forms is the waistline.

Wrist to Underarm (C): Measure from the wrist along the inside of the arm to approximately 1" [2.5 cm] from underarm crease. This is the measurement for the sleeve.

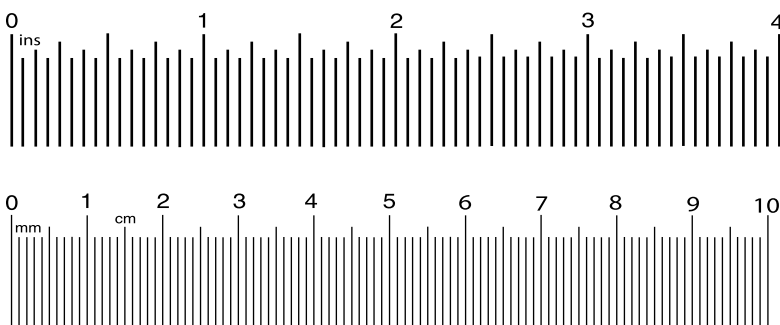

HEAD MEASUREMENTS

Measure around the head. Start with tape line at side above ear. Run tape line around head through center of forehead on hair line, across widest point at back of head and back to side to meet tape line again. This measurement is your head size.

HEAD CIRCUMFERENCE CHART

	Infant / Child				Adult	
	Preemie	Baby	Toddler	Child	Woman	Man
Circumference (in)	12"	14"	16"	18"	20"	22"
Circumference (cm)	30.5 cm	35.5 cm	40.5 cm	45.5 cm	50.5 cm	56 cm

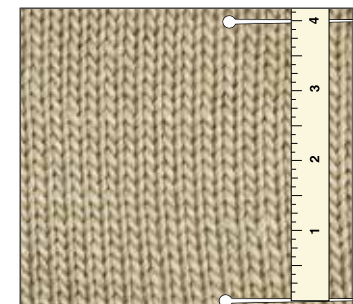

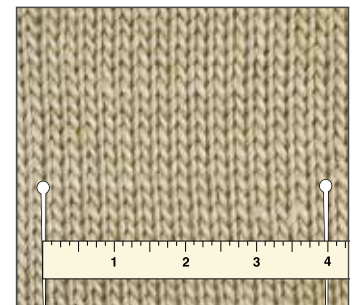

GAUGE

Knitting gauge swatches will ensure that your knitting matches the knitting used for calculations of the pattern you've chosen. Every pattern will have a section called "Gauge" listed after "Materials". To knit your gauge swatch, use the same yarn and size of needles quoted in the pattern and knit a sample at least 5" [12.5 cm] square. Place the sample on a hard flat surface. To check stitch gauge, measure across the knitting horizontally and mark 4" [10 cm]. Count the number of stitches between the pins. To measure row gauge, measure vertically and mark 4" [10 cm]. Count the number of rows between the pins. If you have more than the quoted number of stitches or rows, your knitting is tight and you need to try again with the next larger size needles. If you have fewer than the quoted number of stitches or rows, your knitting is loose and you need to try the next smaller size needles. Keep trying until your knitting matches the quoted numbers. Remember that the needle sizes quoted in patterns are based on average knitters; many knitters will have to adjust their needle sizes.
